

# Accelerate Your Impact Through PROGRAM DEVELOPMENT

Our clients are addressing complex and critical issues. We follow the Plan-Do-Study-Act cycle for program development and implementation. We help clients assess, design, launch and evaluate programs and services in order to meet community needs and apply the latest research.

## COLLABORATE

Through engagement with your team and key stakeholders in the community, we solicit feedback every step of the way from planning to design, implementation and evaluation. This engagement helps to ensure ownership and buy-in well beyond the consultation period.

## ASSESS

By taking the time to review the literature in the field, benchmark best practices and evidence-based models and review your organization's current programming, we identify the gaps and opportunities available in the industry.

## CREATE

From the information collected, we will develop the program elements necessary to fully and successfully implement the program.

“ We felt like “wow” we really got a lot out of working with TCG. They were timely, professional, and did a wonderful job with the development of curriculum for our Tu Futuro Program. ”

Miriam Acevedo Davis, President & CEO, La Plaza

## OUR SERVICES:

- ☑ Assess the current market, research best practices and trends, and benchmark successful models
- ☑ Facilitate partnership development
- ☑ Review current programming and make recommendations to modify and strengthen
- ☑ Follow Implementation Science - the Plan-Do-Study-Act process to support high outcomes
